

# The Sequential One

## S110 Skull

MCT Watches presents the Sequential One – S110 Skull, a 10-piece limited series that stages a dance of death in celebration of life.

Like a playful, off-beat pirate's flag, the skull takes pride of place at the centre of this model, framed by a cushion-shaped case. Meticulously carved out of ultra-thin aluminium, the skull remains light enough to accompany the hour-change ballet, successively revealing one of the brand's four iconic rotating modules. As a static counterpoint to this revolving skull, the crossed bridge arms subtly evoke the crossbones inseparably associated with this universal symbol. The Sequential One – S110 Skull is available in four versions: yellow, green or aluminium colour accents enliven the skull, the crossed bridges, the hands and the hour-markers, as well as the strap on the three first variations. The all-black interpretation features an all-embracing Super-LumiNova treatment on the skull and hour-markers: a first for MCT Watches.

Virile, stripped down to essentials, infused with raw strength and more intense than ever, the Sequential One – S110 Skull celebrates its owner's deeply cherished independence and insolent freedom.

This limited edition will be unveiled today with the opening of the "Salón Internacional Alta Relojería 2016" in Mexico, birthplace of the famous "Festival of Skulls" (*calaveras*) tradition.
